[04:55:40] **Abhishek Singla** : I am trzing to add mz dns details to my firebase account and its not updating.

[04:55:43] [Suzy Q joined the chat]

[04:56:00] **Suzy Q** : Hello! Thank you for contacting our Namecheap support team.

To assist you better, could you please clarify which domain name you are trying to update the DNS details for? This will help us provide more specific guidance regarding your DNS setup with Firebase.

[04:56:06] **Abhishek Singla** : soulamore.com

[04:56:25] **Suzy Q** : Thank you for providing your domain name, soulamore.com.

To help you further, could you please clarify what specific DNS details you are trying to add or update for your Firebase account? For example, are you adding A records, CNAME records, or TXT records for domain verification? Also, are you seeing any specific error messages or issues when trying to update the DNS records?

This information will help us guide you more accurately.

[04:56:44] **Abhishek Singla** : All of them let me share screenshot

[04:57:03] **Suzy Q** : Thank you for letting me know. Unfortunately, I am unable to view screenshots directly. However, you can describe the exact DNS records you are trying to add (such as the type of record, the host/name, and the value), as well as any error messages or issues you are encountering.

Could you please provide the details of the DNS records you are attempting to add for soulamore.com and any specific errors you see? This will help me assist you more effectively.

[04:57:18] **Abhishek Singla** :

[04:57:35] **Suzy Q** : Please allow me a minute, I'll transfer you to a live support agent for further assistance.

[04:57:41] [Pavlo K. joined the chat]

[04:57:41] [Suzy Q left the chat]

[04:57:47] **Pavlo K.** : Hello, I will be happy to assist you further.

[04:57:54] **Pavlo K.** : Could you log into your account to complete account ownership verification automatically? You can do it before starting a chat conversation or at any time during the chat. Or please provide me with the username and Support PIN available at <https://ap.www.namecheap.com/settings/security>

[04:58:48] **Abhishek Singla** :
[22222222.png] [1111111111.png]

[04:59:22] **Abhishek Singla** : support pin is 1147

[04:59:25] [Contact details sent successfully.]

[04:59:33] **Abhishek Singla** : username is abhisheksingla0206

[04:59:54] **Abhishek Singla** : and in that screenshot wirth Cname there is one record that I should delete. with IP address 198.54.

[05:00:14] **Abhishek Singla** : 198.54.117.242 ythat does not even exist,. I have shared all the details with you.

[05:01:29] **Pavlo K.** : Thank you!
Please let me transfer our chat session to another representative who will assist you better with this request.

[05:01:44] [Danylo R. joined the chat]

[05:01:44] [Pavlo K. left the chat]

[05:01:58] **Danylo R.** : Hello. I will be assisting you further. Please allow me 5-7 minutes to check the previous conversation.

[05:03:23] **Abhishek Singla** : alright. also I might have to leave for an important meeting i will inform but please take this whole case into consideration whe I am not available live. and respond to me on registered email as well as on contact.soulamore@gmail.com

[05:04:36] **Danylo R.** : Per my check, the host fields for the records are specified incorrectly.

Please keep in mind, on the side of Namecheap, our system adds the name of the domain to the host field automatically on the backed, so it should not be present on your side.

Please change the Host fields of the A and TXT record to "@" and the Host field of the CNAME record to "www"

[05:04:49] **Abhishek Singla** : as it is very urgent my site is not live. and raropay is not accepting my payment integration so keep this case into consideration so that.

[05:05:11] **Abhishek Singla** : i am trying that righ tnow

[05:06:46] **Abhishek Singla** : I just did that. and what about CNAME? is it correct?

[05:07:36] **Danylo R.** : As I can see, you have changed the Host field to @ only for the TXT record. Please change it for the A record as well.

[05:07:53] **Danylo R.** : For the CNAME record, change the Host field to "www"

[05:08:16] **Abhishek Singla** :
[3333333333.png]

[05:08:53] **Abhishek Singla** : Updated
[44444444444444444444.png]

[05:09:39] **Danylo R.** : Yes, now the records look correct. Please keep in mind, it may take up to 30 minutes for the changes to take effect.

[05:10:30] **Abhishek Singla** : Alright. I will wait., can you send me a log of all this to my email too as a standard of reports. I need it for my documents.

[05:11:27] **Danylo R.** : Do you mean you want to have a transcript of this chat?

[05:12:04] **Abhishek Singla** : yeah. i want to log it in my doucments about the problem and the solution for record pupoises to avoiud problems in future

[05:12:38] **Danylo R.** : The transcript of our conversation can be downloaded from your side by clicking on the gear icon in the top right corner. You will see the "Download chat transcript (.pdf)" option.
